

Housing features:

- CNC milled high quality Aluminium 6082 grade case
- Polished high-alloyed steel cover plate (INOX V4A)
- Cover plate available in rectangular and circular shape
- Tempered sodalime safety glass for operating temperatures up to 150° C
- Cable plug with seal
- Weltec Dualproof© technology for dust- and waterproof application fields

High power light engine features

- High power LED engines with up to 376 Lumen
- Wide range of current mode drivers available
- Dimmable current mode drivers available
- Warm white and cold white light available
- Optical lenses with 15° and 25° available
- Excellent thermal design for high temperature environments with up to 60° C
- Selectable cable lenght
- Permanent immersion cable available
- Silicone cable for high temperatures available

Dualproof© light engine features

- LED engine with 9 PLCC6 LED
- High light output power with 288 Lumen for cold white and 270 Lumen for warm white
- Colored LED and full color RGB LED engine available
- Excellent thermal design for high temperature environments with up to 80° C for Dualproof© technology
- Water, dust and steam proof design due to innovative Dualproof© technology
- Wide angle light output of 120°
- Selectable cable lenght
- Permanent immersion cable available
- Silicone cable for high temperatures available
- One spot model for seven fixed colors and full color RGB for stock reduction and easy managemant
